Acknowledgments

This book has been a real labor of love. There is no way that I could have ever completed this mammoth project without the help and support of many people. Thanks are owed to:

—The staff at Prima, especially Jon, Stacy, and most of all Brooke, for dealing with me in those moments of pique, frustration, and stress. You do a good job and I'm grateful, even when grumpy.

—Nintendo of America, for deciding to bring this wonderful game to the states. Thanks to Juana Tingdale and Cammy Budd for all their support on our Nintendo products. Thanks are also due to Ellen Enrico, Michael Kelbaugh, and Bill Giese for all of their hard work and reams of information. And especially to Bill for the awesome Mewtwo toy!

—Ryan Li, my Pokémon e-mail pal, for all of the strategic discussions about the later stages of the game. Congratulations on getting all 150 pocket monsters!

—My mom, for giving up the first part of her vacation with me. I really appreciate your patience and support.

—And, most importantly, my partner in crime, Jim Ratkos for the meticulously crafted maps for which he gave up much sleep and other free time. You're a great friend and I appreciate your contribution more than you'll ever understand.

How I Became a Pokémoniac

As a writer of strategy guides, I find myself playing a lot of games—but rarely for fun and entertainment (as is often the case when a pastime becomes a job). But in March 1998, my writing partner and I found a place where we could order copies of a Japanese game called Pocket Monsters. With rumors floating around about a possible American release, we picked up this mysterious little game not knowing what we were in for. In fact, it sat unopened on my bookshelf for almost a month until I found myself on a plane from Michigan to California with nothing to do. By the return flight, I was hooked and found myself playing this game everywhere and anywhere, from my bedroom in the wee hours of the morning to the checkout line at my local grocery store. There was something about Pokémon (as it's now called), that sucked me in and kept me playing even when I was supposed to be doing other things.

So what is Pokémon, and why is it so addictive that more than eight million copies of this game have been sold in Japan? Ultimately, Pokémon is a role-playing game, but it's also much more. It's a game that is both simple and complex at the same time. It's a game about collecting monsters (150 of them, to be precise), which encourages you to look to others for help in getting the missing pieces. Pokémon is also about raising monsters and about strategy and fighting for a cause.

Its appeal lies in the fact that there's always something new to do or accomplish. It's never boring, and there are always new challenges waiting on the horizon. You can fight against established Trainers for Badges that will boost your abilities in some way or explore caves for treasure or rare, legendary Pokémon. Even those "Random Battles" prove helpful when you're scouring the countryside for new Wild Pokémon or trying to get a favorite monster to its next evolution point. And the portable size of the Game Boy® means you can take it with you anywhere!

So, sit back, relax, and enjoy your stay in the world of Pokémon. And don't be concerned if it takes over your life. It's supposed to!

How to Become a Master Pokémon Trainer

Welcome to the world of Pokémon! Once you start this game, you'll find yourself immersed in a world that is as challenging as it is fun. Your mission: To become the world's greatest Pokémon Trainer. To do this, you'll have to wander down many streets and through cities, towns, and dungeons—and defeat many Rivals, including the one who used to be your best friend. You also have to find and collect 150 Pokémon and raise some of them to be your bettermost fighters. It takes skill and determination, not to mention a bit of luck. But if you follow the advice given in these pages, you should have no problem!

Note

It's highly recommended that you read the game manual to familiarize yourself with the basics of gameplay. The purpose of this chapter is not to repeat the instructions, but rather to expand on them and give you more advanced techniques.

The Red vs. Blue Question

So, what's the difference between the Red and Blue versions of the game? In a nutshell, the two games are very similar. They have the same characters, the same plot, and the same map. The differences are in the assortment of Pokémon that each version of the cartridge contains.

I. Each version of the game contains 11 unique Pokémon.

Red Version	Blue Version
Ekans	Sandshrew
Arbok	Sandslash
Oddish	Meowth
Gloom	Persian
Vileplume	Bellsprout
Mankey	Weepinbell
Primeape	Victreebel
Growlithe	Vulpix
Arcanine	Ninetales
Scyther	Magmar
Electabuzz	Pinsir

II. The Pokémon you can buy at the Coin Exchange (and their prices) differ in each version.

Red Version	Blue Version
Abra 180CR	Abra 120CR
Clefairy 500CR	Clefairy 750CR
Nidorina 1,200CR	Nidorino 1,200CR
Dratini 2,800CR	Pinsir 2,500CR
Scyther 5,500CR	Dratini 4,600CR
Porygon 9,999CR	Porygon 6,500CR

You'll also find that some species of Pokémon appear in one place in the Red version, but somewhere else in the Blue version. For example, you'll find Horsea and Seadra in the Seafoam Islands in the Red version of the game, but Krabby and Kingler in the Blue version.

Also, certain Pokémon appear more frequently in one version than the other. There are more Weedle and Kakuna in the Red version and Caterpie and Metapod in the Blue. More female Nidoran roam the thickets of the Blue version of Pokémon than male, while you'll be beating male Nidoran off with a stick in the Red version of the game. Get the picture?

Should these differences affect the color of the game you buy? Well, that's a matter of personal taste. If there's a certain unique monster that you must have, then pick up the version that contains that monster. If you like the color red more than blue, grab the red one. The monster sets in both version of the game are equal in terms of strength and elemental mix. And if you're planning on finding all 150 Pokémon, you'll get to see every single one of them eventually anyway.

Getting Started

When you first boot up Pokémon, you'll be faced with three immediate choices: what to name your character, what to name your Rival, and which Pokémon to start the game with. Of the three, it is the later question which is the most important. Once you've found Prof. Oak, he'll take you back to his Lab, where you can choose one Pokémon from his remaining group of three. Your Rival gets to choose next and then the remaining Poké Ball goes to Prof. Oak (although he'll leave it where it is for the entire game).

But which to choose ...? Conventional wisdom says that the Bulbasaur is your best bet. It levels up more quickly than the other two and, being a Grass type, it's extremely effective against the Ground and Water types of Pokémon in the first two Gyms. The Charmander, with its fire and ability to equip strong offensive skills and two of the five Hidden Skills, is my personal choice but it takes the longest to raise and is not very strong against the first two Trainers. However, if you team it up with an Electric Pokémon, like a Pikachu, then you'll have a powerful team that can take on most anything in the game. The same goes for the Squirtle. This character is strong against the Ground Pokémon in the first Gym and can also equip the powerful water-based skill machine given to you when you defeat Misty at the Cerulean City Gym.

Ultimately, you should choose the one that best suits your personality. There really is no correct choice here, so don't worry about making a mistake. Besides, you'll have the opportunity to capture up to 10 more types of Pokémon between Pallet Town and your appointment with Brock at the Pewter City Gym, and you'll want to fill out your team with some of them.

Note

The Pokémon you choose has a direct bearing on which one your Rival ends up with. If you choose the Charmander, your Rival will most likely end up taking the Squirtle. Choose the Bulbasaur and he'll take the Charmander. If you want the Squirtle, he'll settle for the Bulbasaur.

The Art of Capturing Pokémon

You have to know how to capture Pokémon if you want to succeed in this game. There's just no way around it! First, you have to have a Poké Ball, which you can buy at any of the Poké Marts in a town or city near you. Then you have to get into a battle with a Wild Pokémon. The rules of the game state that you can't steal Pokémon from other Trainers, so don't try it or you'll end up wasting a Poké Ball. The only fair game is what you find in the patches of long grass on the routes between towns or in dungeons, forests, ponds (once you have a fishing pole), or caves. You'll also have opportunities to trade people for rare Pokémon, but we'll deal with that later on.

Once you've flushed out a Wild Pokémon, you must weaken it before you can capture it in a Poké Ball. Ideally, you'll want to bring it as close to the point of fainting without actually defeating it before using your Poké Ball. This means that you have to be careful. If you find yourself battling a Pokémon that you really want to capture (especially if they don't appear very commonly, like a Pikachu or Clefairy), don't send your strongest fighters against it or use skills that are sure to defeat it in one round. Choose tamed Pokémon of a similar experience level who you are confident will survive the battle and who can inflict a controllable amount of damage. Skills that produce paralysis or sleep are also good ways to ensure that you don't miss.

As you progress through the game, you'll be able to buy more effective versions of the basic Poké Ball that will work better against the more powerful monsters. Don't expect to have an easier time capturing Pokémon, though. The contents of Poké Marts change to correspond with the level of Pokémon and challenges that you will meet up with in that section of the game. Using an Ultra Ball, which is the most effective Poké Ball that you can buy in a store, on a LV2 Spearow will certainly guarantee your chances of capturing that creature (unless you let your LV30+ Pokémon attack it), but don't even consider using a basic Poké Ball against one of the legendary bird trio or that LV70 Mewtwo! In fact, extremely rare and powerful Pokémon like the bird trio of Articuno, Zapdos, and Moltres; the awesome Mewtwo; or even the sleepy Snorlax will often require you to toss somewhere in the neighborhood of 50 Ultra Balls before you can capture them! This game is less about strength than it is about patience and cunning.

The Care and Feeding of Your Pokémon

For the most part, taking care of a troop of Pokémon is pretty easy as long as you remember to heal its wounds and take it for regular checkups at the many Pokémon Centers throughout the land. Still, there are a few extra things involved in raising a Pokémon that is more than just "fighting fit."

There is a reason why people say that a trained Pokémon is stronger than a Wild Pokémon of the same experience level. When you train a Pokémon of your own you have a great amount of influence over its development. You decide whether or not it evolves at certain points, which skills it learns, etc. Captured Pokémon also receive bonuses to their attack and defense strengths, speed, and special skills from the Badges you've collected. You can customize your Pokémon further by equipping them with skills from Technical Machines (TMs) or Hidden Machines (HMs) and by feeding them attribute-raising vitamins and minerals like Calcium, Iron, Carbos, etc.

It's also better, whenever possible, to raise Pokémon from a young age. A Chansey caught in the Safari Zone at the relatively low level of 23 and raised to LV 50+ will have better overall stats and be much stronger than an LV50+ one caught in the Unknown Dungeon. When presented with the choice of keeping a self-taught monster or replacing it with a newly caught version with a slightly higher experience level, be sure to check out its stats and collection of skills—I think you'll be surprised by what you find.

When you raise a Pokémon from a lower level, you also have more control over when it evolves. Pushing the B Button during an evolution sequence will prevent the Pokémon from changing into the next form. There are pros and cons to doing this however. A first-form

Pokémon has the ability to learn skills much faster than its more evolved cousins. For example, a Squirtle can learn the powerful Hydro Pump skill at LV 42, while the Wartortle will have to wait until he reaches LV 47 and the Blastoise until LV 52—10 levels later! If you're raising a Pokémon that evolves by means other than leveling up (i.e., with an Element Stone or by trading), there is a chance that evolution will keep them from learning any new skills at all or will make them learn a whole new set.

On the other hand, evolution tends to make Pokémon stronger and more flexible. Many times, reaching a new stage will allow a Pokémon to use different TMs or learn more powerful skills. There are a few Pokémon, like the Magikarp, that evolution will change from a weaker creature to a frightening and all-powerful monster. Make sure that you know your Pokémon before deciding how to raise them!

Note

You don't have to raise all of your low-level Pokémon if you don't want to. But if you decide that you really want a certain Pokémon in your main group of monsters, it's better to grab one while it's young than to wait until you can capture it at a higher level. Also, there are some Pokémon that appear in the later stages of the game where you won't have that luxury; there are also some Pokémon that you won't want to use regardless of what level you can capture them at.

Evolution

Most Pokémon change forms as they grow more experienced. Some Pokémon will even evolve twice before they reach their final form, while others won't evolve at all. There are three types of evolution in the world of Pokémon—leveling up, use of an Elemental Stone, and trading them to another cartridge—and since a Pokémon's method of evolution does have an effect on how often they appear in the game, it's a good idea to understand the fundamentals of Pokémon evolution.

Leveling Up

There are 36 species of Pokémon that reach their second or third form through the simple act of gaining experience and leveling up. This is the most fundamental way that Pokémon evolve and also the most time consuming. It should come as no surprise then to find out that you'll find the majority of these 36 species and even many of their evolved cousins roaming about in the wild. If you're trying to collect all 150 Pokémon, raise only those that you want to play an active role in your party and try to capture as many forms of the others as you can.

Elemental Stones

Many Pokémon can be coaxed into evolving with the use of an Elemental Stone. Four of the five stones (Fire, Water, Leaf, Thunder, and Moon) can be found in Item Balls in dungeons or bought at the Celadon Dept. Store. The Moon Stone is the rarest of them all and is found in dungeons only. Because your quantity of these is limited, use them wisely. You won't be able to evolve all of the Pokémon who need them! Seventeen species in all grow with the use of Elemental Stones.

Note

Evolving a Pokémon with an Elemental Stone is risky business. The majority of creatures who evolve this way will either lose their ability to pick up learned skills or will learn different skills than those set for the first or second form. Because you can use the stones at any time, it's a good idea to wait until the Pokémon is well trained and then upgrade the monster.

Note

Unlike Pokémon who evolve through the use of Elemental Stones, the four Pokémon brought about by trading aren't penalized when it comes to learning new skills. In fact, they retain the same learning rate as their second-form counterparts.

Trading

There are four species of Pokémon that evolve suddenly and mysteriously when you trade them with a friend at the Link Cable Club. All four species (Abra, Machop, Geodude, and Gastly) have three different forms, the second of which is reached by leveling the Pokémon up. Once they've reached that second form, you can trade them at any time. Once the Poké Ball has traveled through the Link Cable, the transformation will begin!

Pokémon That Don't Evolve

There are 24 Pokémon that don't face evolution, and they are all rare and precious creatures. Most of them only appear once in dungeons or in in-game trade scenarios, while a few can be found only in special areas like the Safari Zone.

The Importance of Trading

If you want to become a Master Pokémon Trainer, you have to be willing to trade your Pokémon. This is the only way that you'll be able to collect all 150 Pokémon. Within the game itself you'll find four people who are willing to trade their rare Pokémon for your more common ones. When you run across these people, make a note of their location and come back with the Pokémon they've requested. Because they're only looking for common Pokémon, get two and trade them the extra one.

Getting the unique Pokémon from the other version of the game, as well as the Pokémon that you didn't choose in certain parts of the game, requires you to link up with a friend at the Link Cable Club. Remember each version of the game has 11 Pokémon that you will only find on that particular cartridge. So if you want a Meowth and you're playing the Red version of the game, you'll need to find someone with both a Link Cable, a Blue version of the game, and an extra Meowth. You perform trades by going to the Link Cable Club counter at any local Pokémon Center. Enter the Trading Room and sit down at the table to negotiate possible trades. Once you trade a Pokémon, it's gone from your cart until you trade it back. You still retain credit for capturing it in your Pokédex, which opens up the floor for possible "temporary" trades. This works especially well if your friend needs credit for a certain Pokémon that you're unwilling to part with.

Trading Pokémon also has the added benefit of increasing the amount of experience that the traded Pokémon earns in battle. A Pokémon traded to you from another cartridge earns 1.5 times more experience than a normal Pokémon. There are also four types of Pokémon that evolve into their final form only when they're traded across a Link Cable.

A Few Do's and Don'ts Before Playing

Play this Game with a Friend—or Better Yet, Two!

Trading is an integral part of Pokémon, so the sooner you get used to it, the better off you'll be. If you don't want to deal with friends and you have an extra Game Boy and a Link Cable, then buy both versions of the game and trade with yourself.

Regardless of which you choose, getting all 150 Pokémon requires a carefully orchestrated and planned effort and is best done between three people. Here's a list of the points at which you'll need to make plans ahead of time and decide who gets what:

1. The official choosing of starter Pokémon at the beginning of the game.
2. Dome Fossil or Helix Fossil at the bottom of Mt. Moon?
3. Porygon for 9,999CR (Red Version) or 6,500CR (Blue Version)?
4. Hitmonlee or Hitmonchan at the splinter Gym in Saffron City?
5. Evolve Eevee with a Thunder Stone, Water Stone, or Fire Stone?

If you assign each partner a role, then you'll have a much easier time collecting Pokémon without duplicating rare ones.

Don't Concentrate on Raising One Character Over the Others

We all know how it goes. You get a Pokémon that you really like and you use it more often than any of the others. That's fine, but it's better if you share the wealth and experience points for several reasons. A well-balanced team made up of equally strong Pokémon will fare much better against the Elite Four and your Rival. It also guarantees you backup in case your favorite Pokémon runs out of PP or is incapacitated in battle. Remember, as the game progresses the number of Trainers you'll have to defeat in any one area increases too, as does the challenge they present.

Take Advantage of the 1.5 Experience Bonus of Traded Pokémon

If you find yourself with a Pokémon that you need raised in a short amount of time, try trading it to another cartridge. Traded Pokémon receive 1.5 times the experience points of regular Pokémon and they can add up in hurry. This is an especially effective way to level up more powerful Pokémon who evolve at higher levels than normal, like the Dratini.

Don't Try to Play the Game from the Beginning with Your Friend's LV70 Mewtwo

It sounds like a good idea, doesn't it? But, unfortunately, Pokémon has incorporated a system of checks and balances with the Badge system that will encourage you not to do this. As you'll find out from a citizen of Pewter City, Pokémon can choose not to obey a new and inexperienced Trainer. In fact, it is not until you reach Cerulean City and win the Cascade Badge that you are guaranteed mastery over all Pokémon up to LV 30. The Rainbow Badge extends that mastery to LV 50 Pokémon, and the Marsh Badge to LV 70 Pokémon. When you defeat the final Leader and acquire the Earth Badge then all Pokémon, regardless of level, will obey you without hesitation. Until then, traded Pokémon, in addition to captured Pokémon, are very susceptible to this little rule and you'll soon find that the LV 70 Mewtwo that you thought would help you win the game in no time, actually spends most of its time sulking and refusing to perform.

Save Often

Saving has its advantages. If you're defeated by a Trainer or one of the Gym Leaders, you'll be resurrected at the last Pokémon Center visited. But, it'll come at a price—namely, half your money!

We also recommend that you save the game before important battles or when you run across one of the legendary Pokémon like Zapdos or the Mewtwo. Because you only get one chance to capture them, saving allows you to restart if something unforeseen happens, like you run out of Ultra Balls or accidentally defeat them.

Don't Be Fooled; Trading Your Pokémon Doesn't Have to Be Permanent

When you trade a Pokémon, you automatically get credit for having captured it. You won't lose this credit if you trade the Pokémon back to the original owner. So, for those of you who are squeamish at the thought of losing one of your precious monsters, remember to stipulate this as a term of agreement before you trade with your friends.

Remember to Buy Antidotes and Other Curatives Before Entering Dungeons

The worst thing in the world is to lose a fight to a monster who fights by putting your Pokémon to sleep because you didn't have a bottle of Awakening potion. Always stock up on potions, antidotes, and other curatives before venturing into unknown locales!

Don't Forget that Pokémon Can Be Afflicted by Only One Negative Status at a Time

However, if your Pokémon do end up paralyzed or poisoned, think twice before healing them during battle. A paralyzed Pokémon is a hindrance at times, but that status anomaly prevents the enemy from hitting it with something worse, like sleep or ice.

Do Try to Match Pokémon in Battle to Maximize Their Effectiveness

The manual for Pokémon provides you with a chart illustrating all the relationships between the different types of Pokémon. Whenever possible, you'll want to sic Pokémon that have a special affinity against the enemy that appears. If you match your Pokémon well, you'll find that Pokémon that are weaker than the enemy have a fighting chance at beating them because of the attack bonus they receive.

More importantly, the chart will keep you from wasting your Pokémon's time fighting against enemies that it'll have no effect on.

Don't Be Afraid to Change Pokémon in the Midst of Battle

Yes, the old bait and switch is perfectly legal here in the world of Pokémon. If you pick up a Pokémon that is much weaker than your current favorites, don't be afraid to level it up by letting it spend a quick round in battle. In fact, moving it to the top of your list and then swapping it with a more powerful fighter is one of the quickest and safest ways to raise a Pokémon. After all, experience points are equally divided between all of the battle's participants!

Experiment

You won't know what's possible until you try it out for yourself. So don't be afraid to mix and match TMs or raise interesting sounding characters. There's no right or wrong way to become a Master Pokémon Trainer, so just enjoy the game.

A Walk Through the World of POKÉMON

Part One: The Quick and Dirty Path

If you just want a quick overview of where to go and who to see, then look no further! What appears on the following two pages is a breakdown of the major events in the order they happen. It'll tell you how to travel through the world as well as what to get and who to see in each area. If you use this guide in conjunction with the map pages that follow, you'll be sure to win the acclaimed title of Master Pokémon Trainer in style.

Note

Once you've gotten the Town Map from your Rival's sister, you can use it to get clues as to where to go next. Pushing up on the D-Pad will move the cursor to the next town or route that you should take and, for the most part, will describe the path you must journey before you meet the Elite Four from the Pokémon League.

The End ... or Is It?

Part Two: A Detailed Look at the World of Pokémon

Pallet Town

This tiny little town is where you were born and raised. Now you're leaving it to go and fulfill your destiny as a Master Pokémon Trainer. Everyone feels a bit sad, but realizes that you must leave the nest sometime. Your goal here is to find the elusive Prof. Oak and earn your first Pokémon.

Route One

2. Prof. Oak?

Wanna jump start the game? Then just try leaving Pallet Town. That will make Prof. Oak come running in an instant!

3. The Lab

Here in Prof. Oak's lab, you'll receive two things at two different times. First, you'll get your choice from the three Pokémon that the Professor has left in his collection. Hmmm Will you take the flowery Bulbasaur, the water-squirting Squirtle, or the fiery Charmander? Whichever you choose, be prepared to defend yourself against your Rival from next door. That bully just won't leave you alone. Later on, once you've delivered a certain Parcel to Prof. Oak, you'll get your Pokédex and be able to buy Poké Balls and start your collection of Pokémon! Happy hunting.

1. A Little Bit of Home-Cooked Goodness

Inside your house, you'll find the usual luxuries that will remind you of being "home." Upstairs is your SNES and computer, where you'll find a Potion tucked away for just this occasion. Downstairs in the living room, you'll find your mother, who's always willing to provide comfort and a healing dose of chicken soup when you need it. If you're in the neighborhood, pay her a visit and she'll heal your wounds for free!

4. Why Should You Visit Your Rival's Home?

I don't know, maybe his sister has a crush on you or something. Pay her a visit after you get your Pokédex and she'll give you a copy of the Town Map. This item is awesome and will help you get from town to town!

The roads here in the world of Pokémon can be pretty dangerous if you aren't prepared. The first time you'll walk down this road, it'll just be you and your first Pokémon. But after you gain the ability to capture wild Pokémon, you can use this as a breeding ground. Take this road north to Viridian City.

Route 1

1. The Dangers of Long Grass

Wherever you see these thatches of long wavy grass, you'll find Wild Pokémon. It never fails and, with the exception of dungeons and the water, you won't find Wild Pokémon anywhere else! So ... if your Pokémon is low on Hit Points or you don't want to fight in any more random battles, stay out of the grass.

2. The Rewards of Being Friendly

Whenever you encounter a person in a town or on a road, take the time to talk with them. They usually have helpful words of wisdom to share or even, in the case of this guy, a spare item.

Tip

This is the first opportunity you'll have to fight Wild Pokémon. The first time up and down this road, you won't have the use of Poké Balls to capture Pokémon or be able to buy a whole lot of Potions to heal you so you'll need to fight with care. If your Pokémon is getting low on health, use your Potion or stay out of the long grass and avoid battles until you can heal them at a Pokémon Center or your own house.

Viridian City

At first, you won't find much to do here since the Gym's closed up tight. But you will get to visit your first Pokémon Center and shop at a Poké Mart. It's a shame they're out of Potions, though.

1. My Pokémon Needs Help!

Whenever you enter a new city, one of the first places you'll want to locate is the Pokémon Center. Here you can heal your Pokémon for free at the first counter. Just leave your wounded fighters with the attendant, and she'll return them to you in "fighting fit" form. You can also use the computer terminal here to log into your personal Computer (to store items), Someone's Computer (to store Pokémon), and Prof. Oak's Computer (to have your Pokédex evaluated). A good Pokémon Trainer uses these tools wisely and often—especially since you can only carry twenty items and six Pokémon with you.

The counter to the right is where you'll find the Link Cable Club. Come here whenever you want to trade Pokémon with friends or just battle them head to head in the Coliseum!

Note

Whenever you go out capturing Pokémon, your six slots are filled up first. Then, any extra Pokémon are teleported into storage on your Computer account. Pokémon can be saved this way until the box you've currently selected becomes full. When you know you're going to be entering an area with a lot of new Pokémon, like the Safari Zone, it's a good idea to stop by a Pokémon Center and exchange for an empty box.

2. Delivery for Prof. Oak

Here at the Viridian City Poké Mart, you'll find not only shelves of basic supplies, but a post office as well. The clerk has a package for Prof. Oak that must be delivered immediately and his delivery boy's out sick!

Maybe if you do

this favor for him now, he'll let you come back and buy some supplies for your long journey ahead.

3. Pokémon Hunting on Route 22

Once you can buy Poké Balls and capture Wild Pokémon, you might want to consider hunting in the long grasses of Route 22. Here, not too far from Viridian City and the Pokémon Center, you'll find lots of low-level Pidgey, Rattata, Spearow, Nidoran♂, and Nidoran♀. Don't go too far though. Your Rival is lurking along the path to

the top and is dying to challenge you to another fight. Before accepting his challenge, make sure that you have at least two Pokémon trained to LV 9 or above. Your Rival will have two on his side: a LV 9 Pidgey and his default Pokémon at LV 8.

Note

Before you go up against any type of Trainer or Gym Leader, you'll want to make sure that you've spent some time fighting random battles and capturing Wild Pokémon. A good rule of thumb is to make sure that you have as many Pokémon ready to fight as the Trainer does and that they are all at least at the same level of experience if not higher! This may be overkill, but it will prevent you from fainting most of the time.

4. The Gym Is Closed?

Yup, and it will stay that way until you've defeated the other seven Gym Leaders. Sorry. Come back later.

Gym Leader Lowdown #8: Giovanni of the Viridian City Gym

We're jumping the gun a bit here! You won't battle this Trainer officially until the end of the game, so if you don't want to know about him mark this page and come back to it later.

Giovanni is the leader of Team Rocket, and boy is he mad at you! All the Junior Trainers in his Gym are dedicated to Ground Pokémon of the highest levels. When you do pay this Gym a visit on your way to the final confrontation at Indigo Plateau, make sure that you have your best Water, Grass, or Ice Pokémon ready to go and at least at LV 50.

Giovanni's Pokémon are mean, and the twisty corridors and transport pads at this Gym will ensure that his Trainers wear you down first.

If you win, you'll get the Earth Badge, which will compel Pokémon of any level to obey your commands and TM 27, the awesome skill Fissure.

Route 2

This tree-lined path takes you to Pewter City via Viridian Forest. There's not much to see or do here—except capture some Bug Pokémon—until you've learned the skill Cut from HM 01. Then you can cut down the little bushes and explore the right side of the road!

1. Entrance to Viridian Forest

This little building leads into Viridian Forest. The people there will tell you a little bit about what to expect, but that's all. Make sure that you've stocked up on Antidote and Poké Balls before you enter. Healing your crew at the Viridian City Pokémon Center first is also a good idea.

2. Diglett's Cave

Until one of your Pokémon learns how to Fly with HM 02, you'll have to rely on Diglett's Cave to take you from the area east of Mt. Moon back to here. With the Cut skill, you'll be able to slice down the saplings blocking the path and go home for a quick visit!

3. Trader Alert!

The person inside this house is willing to trade you his Mr. Mime for your Abra. If you don't have one yet, write a note to yourself to come back when you do!

4. An Illuminating Visit

The people in this building are full of good information about Hidden Machine 05 and its skill Flash. Apparently Pokémon with this skill can light up whole dungeons. If you've captured 10 Pokémon by the time you reach this building, they'll give you your own copy of HM 05.

Note

There are five Hidden Machines hidden in the world of Pokémon that you must find and use if you want to complete your journey. These skill machines differ from Technical Machines in that they are reusable and the skills they contain can be used in battle or while you're traveling on the Field Map. That is, once you've gotten the appropriate Badge. One warning though—once a Pokémon uses a Hidden Machine, he can never unlearn the skill it contains.

Viridian Forest

Viridian Forest is the first place you'll run into the bands of roadside Trainers that will haunt you for the rest of this game. These people like to position themselves by roads or in dungeons and challenge other, unsuspecting Pokémon Trainers. Be on the lookout!

Trainer's Talk

You have three Trainers to deal with here in Viridian Forest, hidden amongst the labyrinth of trees. The three of them will try to attack you with Weedle, Caterpie, and a Kakuna between the levels of 6 and 9. The Kakuna will be the easiest to take out since he can only cast the skill Harden on himself. Try to use a Fire Pokémon like the Charmander or Flight Pokémon like Spearow or Pidgey against them for the best results.

Note

Calling all Pikachu fans. Here's your chance to finally own a Pikachu! You won't find one very often in these woods, but when you do you should try to capture it. Electric Pokémon like Pikachu are great against both Water and Flight Pokémon and make great companions for Charmanders and Squirtles.

Pewter City

Defeating Pewter City's boss is integral to continuing your quest. A sentry from the Gym won't let you enter Route 3 until you've defeated Brock! While you're in town be sure to visit the Museum. They have an exhibit of ancient Pokémon going on that you've got to see.

1. Visit the Poké Mart

Before facing Brock or heading down Route 3 to explore Mt. Moon, be sure to buy some Potions here first.

2. Fight at the Gym!

Are you ready for your first bout with a Gym Leader? From the looks of the pillars at the entrance, it appears that your Rival has already been here and gone.

3. The Pewter Museum of Science

This month's exhibit features the remains of ancient Pokémon. Judging from the skeletons, those monsters were pretty fierce. Go ahead and spend the 50P to get in; it's worth it.

4. Wonder What They're Researching In There?

On the research side of the Museum, which you can enter once you've learned the Cut ability, the paleontologists are

full of stories about fossils being brought to life. And if that's not enough, someone's found a fossil of an Aerodactyl. Maybe they'll let you borrow it?

Gym Leader Lowdown #1: Brock of the Pewter City Gym

The time has finally come to face your first Gym Leader, and he's going to toss you a curve! Up to now, you've only fought tiny Bug, Bird, and Rodent Pokémon and I'll bet they've been pretty easy to defeat. Well, that's about to change.

Brock's Gym is devoted to the art of raising Rock and Ground Pokémon. These chunks of stone and precious gems are hard to defeat unless you have a powerful Water or Grass Pokémon on your side. If you chose the Charmander at the start, make sure that he's a well-seasoned warrior, accompanied by a Bug Pokémon that can help out if assistance is needed.

When you win, Brock will surrender the Boulder Badge and TM 34 as a reward. The Boulder Badge provides a boost to your Pokémon's attack strength and allows you to use the hidden skill Flash anywhere you'd like. TM 34 contains the skill Bide, which will be very familiar to you by the end of your battle with Brock's Onix.

Brock's Pokémon Lineup

Geodude	LV12
Onix	LV14

Note

Consider the Junior Trainers in each Gym a warm-up for the big battle with the leader. The Pokémon they use are of similar types and levels to what the big boss will use against you. Blowing through the Junior Trainers is usually a good sign that you're ready to go up against the Leader.

After that fierce battle with Brock, it's time to relax in a few friendly bouts with the Trainers on this road. Then, head over to Mt. Moon and get ready to do some spelunking!

ROUTE 3

← Pewter City

Mt. Moon

1. You Want To Sell Me What?

At the Pokémon Center outside of Mt. Moon, there's a man selling Magikarp for 500P. He'll make it sound like a good deal, but don't be fooled. Magikarp are not worth that much (until they

become Gyrados), and you can catch them with a fishing pole almost anywhere. Save your money and wait until you get to Vermilion City!

Trainer's Talk

Along Route 3 you'll have to combat eight Trainers. This time, the Bug Catchers are back and they've brought with them stronger Caterpies and Weedles, along with a couple of Kakunas and Metapods. In addition to the Bug Catchers, you'll also run into several Youngsters and Lassies. These Trainers carry common Pokémon that you've seen and captured before or will be able to very soon. All of the Pokémon featured on this route range from LV 9 to LV 14. Your best bet is to be sensible and head back to the Pewter City Pokémon Center after every second or third battle. This is easier and, more importantly, less expensive than relying on Potions and Antidotes alone. You have a big dungeon coming up ahead, so you'll want to conserve your money for the Poké Balls and Potions you'll need while you're there.

Note

Before journeying into Mt. Moon, be sure to search the long grass for a Jigglypuff. These cute little balls of fluff and big eyes are extremely rare and can't be found in the wild anywhere else! If you're into magical and mysterious Pokémon, make this a part of your collection without fail.

Mt. Moon

Team Rocket has infiltrated Mt. Moon, and it would seem that they're up to no good. There are rumors that they've even been stealing rare fossils from the dig going on at the bottom level of the cave. Maybe you'd better go find out what they're up to.

Trainer's Talk

Much like Route 3, the first floor is filled with Youngsters, Bug Catchers, and Lassies. Their motley assortment of Pokémon have grown somewhat and are now between levels 10 and 11. New Pokémon to look out for include a LV 14 Clefairy, an Oddish and Bellsprout duo, and a Super Nerd's pet Magnemite and Voltorb. Expect to battle seven of them before you've cleared the floor. And, as with Route 3, save your Potions and make good use of the Pokémon Center right outside.

Floor B2 is filled with Team Rocket members. These bullies are known for their evil crimes and the way they mistreat Pokémon. The Rockets in Mt. Moon fight with a variety of Normal, Ground, and even Poisonous Pokémon. There are five of them lurking on this floor.

Decisions, Decisions

When you reach the end of Floor B2, you'll find a Super Nerd guarding his find of two rare fossils. If you defeat him, he'll let you choose one of them. The Dome Fossil represents the lost species of Kabuto while the Helix Fossil carries the DNA of the Omanyte. Regardless of which you choose, put it in a safe place and don't lose it!

Cerulean City

Your passage out of Cerulean City is blocked until you accomplish a few things. First you have to defeat Misty at the Cerulean City Gym. Then take a stroll over Nugget Bridge to visit that Pokemaniac, Bill, whom everyone's raving about. If you can help him out of a predicament, he'll reward you handsomely. Once you've done that, your path out of the city will be cleared ... sort of.

1. Trader Alert!

There's a guy over here who wants to trade a rare Jynx for a common Poliwhirl. Can you believe it? If I were you, I'd file this away and when you get a good Fishing Rod, use it to catch one for him!

2. What an Expensive Bike!

Who ever heard of spending a 1,000,000P for a bicycle? A kid like you will never be able to afford that. Wonder if they ever go on sale ...?

3. Shopping, Anyone?

Here's a list of the wares you can purchase in Cerulean City. If battling Wild Pokémon is starting to become a pain, try out some of that Repel spray. I hear it works wonders.

If you didn't know that Misty and her friends were totally into Water Pokémon, you'd almost think this Gym was flooded. Don't think for a minute that you'll be able to avoid the Junior Trainer swimming in the water! The moment that Swimmer sees you, he'll rush right over to the dock you're standing on.

5. What's a Rocket Doing Here?

Team Rocket is up to its old tricks again! This time it's raiding houses and stealing TMs. The owner of this house is distraught about the loss of his new Dig TM. Now he'll have to teach his Diglett the trick himself. Maybe the guy behind the house knows something about it?

6. The Unknown Dungeon

You're dying to know how you get there, aren't you? Well, you'll have to wait until you get HM 03 and the Surf ability. Then go to the other side of Nugget Bridge and surf around to the entrance.

The catch? You have to be a member of the Pokémon League before you can enter, which means beating the Elite Four at Indigo Plateau first.

Gym Leader Lowdown #2: Misty of the Cerulean City Gym

She's cute, she's bubbly, and she always wears a bathing suit. She's Misty, and she raises Pokémon of the Water variety! If you haven't already experienced this with the Squirtle, a strong Electric or

Grass Pokémon is a Water type's worst enemy. Having a Pikachu, Bulbasaur/Ivysaur, or Paras on hand will make this bout go by quickly. If not, make sure that your Pokémon are pretty strong to begin with, around LV 25.

Defeating Misty earns you the Cascade Badge. This one makes all Pokémon up to LV 30 obey you without fail. This will come as a big relief to those of you with traded Pokémon who are misbehaving badly (as long as they're below LV 30). The Cascade Badge also makes it possible for you to use the Cut skill (HM 01) out in the field. In addition to the Cascade Badge you also earn TM 11, which teaches any Water Pokémon the skill Bubble Beam. If you have a Squirtle in your party, this skill makes a great addition to his repertoire.

To reach Bill's house, you'll first have to defeat the 17 other Trainers blocking your path. The first one to come along is none other than your Rival. Now he's up to four Pokémon, including his starting monster, a LV 18 Pidgeotto and a LV 15 Abra. Hopefully you've been keeping up with him!

Nugget Bridge

Once you've defeated your Rival, a Team Rocket Member will challenge you to a duel. Defeat all five of his friends and he'll give you a Nugget as a reward. The hardest of these five Trainers will be the final one, who will attack with a LV 18 Mankey. Because you can return to town and the Pokémon Center at any time during this challenge, it might be a good idea to face this Trainer fully healed. Don't think that number five will be the final Trainer you face here. The Rocket isn't happy that you won and will try to compel you to join his organization with force.

The Practice Area

Right after you've completed the Nugget Bridge challenge you'll face another group of Trainers. The Hikers in this group rely mostly on Ground and Rock Pokémon like Geodude, Machop, and Onix. Be prepared and hit them with a Pokémon using the Bubble Beam skill that you won from Misty. A Pokémon equipped with the Mega Punch skill found in Mt. Moon will also survive against these tough creatures.

Bill's House

The rumors about Bill were right; he is a Pokémaniac. He's even turned himself into a Pokémon! Help him out by starting up the transformer machine in his house. Then, once he's back to his regular self, he'll give you a ticket to the Trainers' Party on the S.S. Anne. Don't forget to visit him a second time to check out his files on rare Pokémon. He has some interesting information about a monster called Eevee.

When you leave Cerulean City through the Burgled House, you'll find that you can't get back in the conventional way until you've found either HM 01 (Cut) or HM 02 (Fly). You can, however, get in through the rock wall on the side of the gym. Head south to the end of the road where you'll find a gatehouse and a small building.

Daycare for Pokémon

If you journey down the field between the two roads, you'll be able to enter a place called the Daycare Center. Here you can leave one of your Pokémon in the care of an expert babysitter. For a small fee, this kind soul will raise your Pokémon for you. Just don't forget to pick it up sometime!

Thirsty Guards

There's a city closer to you than you realize. Unfortunately the roads are under construction and the gatehouse guards are feeling a little bit grouchy because they're really thirsty. Maybe they'd let you pass if you could find them some water or a Soda Pop.

Underground Path

Don't let the closed roads scare you. There are other ways to get around this area. In the house to the right of the gatehouse is the entrance to an Underground Path. This tunnel will take you from Route 5 to Route 6 in no time flat. And you won't even have to fight any monsters on the way.

Route 6

Now that you've made it through the Underground Path, you only need to walk south to Vermilion City. As you go, check the tall grass for rare and unique species of Pokémon.

Trainer's Talk

You'll find Bug Catchers and Junior Trainers alike in this grassy meadow. The most difficult battle will be against a LV 20 Butterfree that has nasty sleep spells. Be sure to stock up on Awakening before you come here.

Before you can enter the Vermilion City Gym, you must have gotten the Cut ability (HM 01) from the Captain of the S.S. Anne. Then you'll have to figure out the code to unlock the door to Lt. Surge's room. Defeat the Junior Trainers and make them talk.

5. A Party on the S.S. Anne

Before you can do much of anything in this city, like take on its Trainer, you'll need to visit the Captain on the S.S. Anne.

6. Trader Alert!

This one is easy. A trader is willing to give up his rare FarFetch'd for a very common Spearow. Surely you have one of those in your collection.

Gym Leader Lowdown #3: Lt. Surge of the Viridian City Gym

Before you can challenge Lt. Surge, you have to undo the electrical lock that he's used to keep people out. The Trainers will talk—once you've beaten them—and tell you its secret. You have to look in the garbage bins and when you find the first lock, the second will be in a neighboring can.

Lt. Surge is the leader of an order of Pokémon Trainers dedicated to Electric Pokémon. Only Ground Pokémon have a special affinity for defeating Electric Pokémon, so if you were able to pick one up during your travels, you might want to equip him with the Dig skill you picked up before leaving Cerulean City.

When you defeat Lt. Surge, you'll receive the Thunder Badge. This Badge allows you to use the hidden skill Fly in and out of battle. It also ups all of your Pokémon's speed. In addition to the Badge, Lt. Surge will also give you his TM 24. This teaches the skill Thunderbolt and is a handy addition to any Electric Pokémon.

This cruise ship is filled with Trainers waiting for a good challenge. As you wander through the decks of this luxury ship, you have the opportunity to talk to the passengers resting in their staterooms. Beware, some will want to fight you, while others will just dispense good advice.

Trainer's Talk

The gang of Trainers on the S.S. Anne are a motley bunch ranging from distinguished Gentlemen and Ladies to coarse Fishermen and Sailors. Their Pokémon are also a mixed bag, but you can count on one thing: when you battle a Fisherman or Sailor, you can expect to see a lot of Water Pokémon. All of them fall within the LV 17 to LV 23 range of experience levels.

What's a Party Without Good Friends?

Well, I wouldn't exactly call your Rival a good friend, but he's here on the S.S. Anne. Use this battle to check your own progress. If you beat him easily, then you're doing a great job!

"Do You Have Anything For Seasickness?"

The Captain is suffering from a dangerous bout of seasickness. When you help him out, he'll give you your first Hidden Machine. This one teaches the valuable skill Cut, which allows you to cut down the small trees blocking parts of the path. With this skill, you'll be able to get into the Viridian City Gym and back into Cerulean City.

Note

Once the Captain has regained his sea legs, it's time to set sail. Leave the boat for any reason, and it will take off without you. If you want to fight all of the Trainers and pick up all of the loot lying around, make sure that you save your trip to the Captain's chambers until the end. This way you can fight and then run out to the Pokémon Center for some healing as often as you'd like.

Route 11

Tackle this route after you've finished your business in Vermilion City and the S.S. Anne. Unfortunately, you won't be able to continue on to Route 12 since the road is blocked by a snoozing Snorlax. If only you could wake it up. Do, however, climb to the top of the gatehouse and meet with Prof. Oak's Aide. You can count on him to have a great item for you if you meet his high standards.

Trainer's Talk

This field is full of Trainers (10 to be exact) divided between Youngsters, Gamblers, and Engineers. Of the three, the Engineers are the most predictable with their electrified Pokémon. The weakest Pokémon you'll fight here is LV 18, while the highest are at LV 21.

Itemfinder

Once you've collected 30 Pokémon, Prof. Oak's Aide will give you a special item called an Itemfinder. Use this tool to locate hidden items. If the Itemfinder locates an item, you will find it on somewhere on that screen. Use it in areas like the Underground Paths or in blocked off areas that appear to have nothing in them.

Diglett's Cave

With the Snorlax blocking the road, you won't have any other choice but to take Diglett's Cave to the other side of the continent. This long and twisting tunnel, home to many Digletts and the odd Dugtrio, is a famous shortcut between Vermilion City and Route 2 near Pewter City.

Route 9

Now that you have the Cut ability, you can take this route to Rock Tunnel and Lavender Town. The Trainers here are at about the same level as those on the S.S. Anne and Route 11, so you should have an easy time with them. If you find that your Pokémon are running short of steam, however, there is a Pokémon Center located right outside the entrance to Rock Tunnel.

Trainer's Talk

This is another area filled with an exhausting amount of Trainers. While you should have an easy time defeating them, their numbers are bound to tire you and your team of Pokémon. Of the three groups that have congregated here, the Junior Trainers will provide you with the most challenge. Their Pokémon are strong (LV 19 to 23) and some of the rarest around, including a Charmander and a powerful Meowth.

A Lovely Stream

When you get the Surf ability (HM 03), you'll want to come back here and explore the stream north of the Pokémon Center. An abandoned Power Plant that is inhabited by tons of Electric Pokémon is said to lie downstream. If you've been looking longingly for a Magnemite of your own, maybe this is the place to try.

Rock Tunnel

Make good use of the Pokémon Center west of the tunnel's opening. You have no idea of what lies inside, and the trek to the other side is long and treacherous.

Rock Tunnel

The Rock Tunnel is a horrible place to visit if you don't have a lantern. Hopefully, you've acquired HM 05 and the Flash skill. Use it to illuminate the dark cavern inside and help you find your way through.

Trainer's Talk

As you would expect, the Rock Tunnel is full of Rock Pokémon and Trainers carrying Rock Pokémon. Keep an eye out for Hikers with their armies of Geodudes and Onix. In addition to the Hikers, you'll also find Pokémaniacs who are desperate to show off their collections of Slowpoke and Cubones.

The Pokémon Trainers here have Pokémon that range in experience from LV 19 to LV 25.

It Sure Is Dark in Here!

You can still make it through without the Flash skill, it's just a lot harder. The walls are slightly illuminated, which will help you find your way around somewhat. Dodging Trainers in the dark will be very tricky.

Lavender Town

This tiny town south of the Rock Tunnel is home to the Pokémon Tower, a place where dead Pokémon are laid to rest. Right now, though, the town is buzzing about the recent hauntings there. Maybe there's something you can do to help out.

1. A Ghostly Building

The first floor of this tall tower is perhaps the safest of them all. It appears that Team Rocket has been abusing Pokémon (especially the Cubone) and it has disrupted the spirits. You can try to climb to the top, but without a Silph Scope you won't be able to determine who is the cause of all this mayhem.

2. Any New Stuff to Buy?

The Lavender City Poké Mart is the first place you'll find the magic medicine, Revive. Having this in your inventory will help you out of a jam, if you should lose a Pokémon in battle.

4. Community Service

Route 8

This is the third path you've traveled that is blocked by the threat of road construction. Fortunately there's another Underground Path that you can take under Saffron City and over to Route 7. There's supposed to be a giant Department Store in nearby Celadon City that is worth checking out!

Trainer's Talk

The nine Trainers here will provide you with a much needed experience boost before you enter Celadon City. The road is split between Lassies, Super Nerds, and Gamblers. Super Nerds like to use Poisonous and Electric Pokémon in battle. You won't see any cute monsters (they leave that to the Lassies), but a lot of toxic pollutants like Koffing and Muk. All of the Pokémon you deal with here are between the levels of 22 and 26.

Underground Path (E-W)

The house to the north of the gatehouse to Saffron City provides an entrance to the east-west Underground Path. Like the one you took between Cerulean City and Vermilion, this path also offers battle-free passage beneath Saffron City to the road on the other side.

Route 7

There's not much here except a plot of land that's rumored to be home to a variety of rare and unique Pokémon. Take the road to the northwest and you'll end up in Celadon City.

Celadon City

Celadon is known for its large Department Store and Game Corner. There are rumors that the Game Corner is actually run by Team Rocket and that their Hideout is somewhere nearby. While you're in town, why don't you mix business with pleasure and pay them a visit?

1. A Rare Opportunity

There's a secret doorway into Celadon Mansion that you shouldn't miss. At the top of the staircase you'll find a solitary room with a Poké Ball inside. Inside that is a very rare Pokémon

indeed, an Eevee. For more information about these creatures, pay Bill the Pokémaniac another visit.

2. The Department Store

The Celadon Department Store is a place where you can find tons of treasure. Here you can buy many items that aren't available anywhere else. When you see what's here, in conjunction with the things you can win at the Coin Exchange, you'll feel like you're in a shopper's paradise!

3. The Gym

You'll have to Cut through a small tree to reach Erika's grassy Gym, and then cut through more saplings to reach Erika once inside. Don't worry—the effort will be worth it.

4. Care for a Drink?

Inside the restaurant and many houses of Celadon City, you'll see what an effect the Game Corner is having on its citizens. There's one guy in here who's ready to give up his Coin Purse, even.

5. The Coin Exchange

When you win money at the Game Corner next door, this is where you come to spend it. There's a lot of cool stuff to buy here that you can't find anywhere else!

6. A Time for Slots

Here in the Game Corner, you'll find people literally glued to their slot machines. If you talk to them, you can count on them to give you coins to go away. You can either sit down to play slots for a while or check out the back of the store. What's that Rocket doing there? Guarding a poster?

TMs Everywhere

Be sure to talk to everyone you meet in the Department Store. They're just giving TMs away there! Also Surf across the little pond in the center of town and talk to the old lady there. She'll give you a TM, too.

Gym Leader Lowdown #4: Erika of the Celadon City Gym

That Erika's a nature lover is plain to see from the look of her Gym. Surrounded by trees and her handmaidens, you'd almost think you stepped into a storybook or something. Grass Pokémon rule

here and that's good for all of you Flame Pokémon carriers. Almost any Pokémon works well against these powerful plants, except for Water, Electric, and Ground types.

When you win, Erika will give you the pretty Rainbow Badge. This ups your Pokémon's attack strength and makes monsters up to LV 50 obey you without fail. The TM she gives you as a parting gift is Mega Drain, which steals HP from enemy Pokémon and gives them to you!

Rooms of Propulsion Pads!

Not having a Lift Key, means that you'll have to make your way through two rooms filled with tiny propulsion pads. These pads propel you unstoppably in the direction they point until you come to another propulsion pad or a stop pad. If you take a moment to figure out which way each set of pads will take you, finding the path across will be easy.

Don't Be Afraid of Roughing Them Up

Once you defeat a Team Rocket member, talk to them a second time and you'll find that they sing like birds. This is the only way that you'll find important items like the Lift Key.

The Leader of the Rockets

In an office off the Elevator you'll find the office of Team Rocket's boss. Giovanni is a busy person, but your appearance in his hideout is enough to make him stop working and pay attention. You'll have to defeat him and his collection of strong (LV 24 to LV 29) Ground and Rock monsters to make him cough up the Silph Scope.

Trainer's Talk

There's nothing but Rockets in here! As you fight your way through the Team Rocket Hideout, you'll see a lot of Poisonous Pokémon and Rattata. These guys are challenging and range in experience from LV 17 to LV 23.

All of the Channelers here will attack you with a Gastly and possibly a Haunter. When you add these to the numbers of wild spirits roaming around, you'll feel like a ghost expert when you're through. To get you started, Ghost Pokémon aren't extremely susceptible to anyone's attacks and they have a stunning resistance to both Normal and Fighting skills. Poison and Bug attacks don't fare too well either, but at least they inflict some damage. Your best bet is to experiment with the Pokémon and skills you have available, and decide what works best for you.

Spiritual Healing

The strange square on the Fifth Floor is there to heal your battle wounds before you go off to face the final two floors. Don't forget where it is, just in case.

1. Silph Co.

This is the source of all of your problems right now, and you might want to take a look around here first. Sometimes it's hard to believe the lengths to which evil-doers will go.

2. The Fighting Dojo: a Splinter Gym

When the Saffron City Gym became too crowded and big, part of their clientele decided to open their own Gym dedicated to raising Fighting Pokémon. Now, going in there is like going into a real Gym, except that instead of a Badge you get your choice of rare Fighting Pokémon as your prize.

Saffron City

Saffron City, nestled in the heart of Pokémon country, is the largest city in the land. Home to Silph Co. headquarters, it hosts some of the finest minds in the world. Which is why it should come as no surprise to you to find Team Rocket here in full force. They've taken over the city and you won't get far unless you kick them out!

3. Saffron City Gym: the Original

Right next door (although inaccessible until you've cleared the Rockets out of town) is the real Gym. Home to a bunch of psychically oriented Trainers, this place is

filled with teleport pads, Channelers, and real live psychics.

4. Mr. Psychic

Visit this house and Mr. Psychic will give you TM 29, which is Psychic.

5. Give the Kid a Doll

If you bring the little girl a Poké Doll from neighboring Celadon City, she'll gladly give you TM 31 (Mimic).

Gym Leader Lowdown #5: Sabrina of the Saffron City Gym

To reach Sabrina, you'll have to teleport almost throughout the entire Gym. The Trainers here (all Psychics and Channelers) are big fans of Psychic and Ghost Pokémon. Ghosts we

already know are immune to Normal and Fighting attacks, and you have to get creative with them to defeat them. Psychics on the other hand are easily defeated by Bugs and their Ghostly friends. If you have either one in your possession, you might want to consider pulling it into the fray.

The Marsh Badge that you receive as a reward makes all Pokémon LV 70 and below obey your every command and TM 46 (Psywave) is sure to please one of your psychically gifted Pokémon.

This 11-floor building is the largest and most tiring dungeon of the game. There are 30 Trainers here ranging from Poison-spitting Rockets to electrical Scientists. The experience levels here start at LV 25 and go up.

Grateful Employees

The employees of the Silph Co. are scared to death—not only about their jobs but their lives as well. If you stop to talk with them and allay their fears, they might have a helpful gift for you. Remember this before you take the teleport pad to the President's office.

Teleport Pads and Key Cards

You will have an easier time if you get the Key Card before using the Teleport pads extensively. By the time you find this item on the Fifth Floor, you should have taken out about half of the enemy Trainers. If you clear out the rest of the levels before you start zapping around, you will have effectively taken care of any deadly situations before going up against the boss.

The Rest Ward

When you find the Silph Co. worker next to the bed, you'll know you're getting close to Giovanni, the head Rocket. Here you can rest and heal your Pokémon's wounds before going up against the boss man himself.

Didn't I Just Fight You?

Why didn't your Rival do anything to free the Silph Co.? Is he just here to taunt you? Defeat him again and then go on to the 11th Floor.

A Master Ball

To rescue the Silph Co. President you must battle with Giovanni once again. This time he's added some high-level Nidoran to his arsenal, so watch out for their poisonous attacks. With Pokémon in the LV 35 to LV 41 range, he's going to be tough to defeat. But if you found the battle against your Rival pretty easy, then this will be too. With Giovanni vanquished once again, you'll find yourself on the receiving end of a fabulous reward, the Master Ball. You only get one of these, so use it with discretion.

Note

It's highly recommended that you store the Master Ball away until you can enter the Unknown Dungeon. The Mewtwo there is fierce but a highly desirable Pokémon. Using your Master Ball on him is a very good idea!

South of Lavender Town is a series of interconnected docks that span the entire eastern coast of the Pokémon realm. If you have the Surf ability, you can glide down the side with no interruptions whatsoever. If you don't, you'll have to walk and deal with the Fishermen you meet on the way.

The Snorlax In the Road

You won't make it far unless you have a Poké Flute in your possession. A big Snorlax is blocking the road and the only way to wake him is with that flute. Once awake, he'll attack and you'll have an opportunity to capture him. Try to use Ultra Balls if you've made it to Fuchsia City already. If not, I hope that you have a large supply of Super Balls on hand. This rare Pokémon is tough to catch.

What a Great Fishing Pole!

One of the Fishing Guru's brothers has bought a house on Route 12. This is a great opportunity for you to learn even more about fishing lore. If you listen closely to what this guy has to say, he'll give you a Super Rod that will allow you to catch all kinds of fish.

There are some patches of land where it's easy to capture the wild second forms of some of your favorite Pokémon. This stretch of the road is one of them. Got 50 Pokémon Yet?

If you've collected 50 Pokémon, Prof. Oak's Aide has another present for you. This time you'll get a piece of research equipment called Exp. All. When you have this amongst your Items, all of the Pokémon you have with you will receive a portion of the experience points handed out after a battle. Here's how it works: The experience points earned are divided in half first and one half is divided among all of your party. The other half is divided among the Pokémon who actually participated in battle. Sound neat? Well, when your party is small it is. But if you are carting around six Pokémon, the allotment of all of those experience points can get kind of time consuming.

Before you can get very far down Route 16, you need two things: the Poké Flute to wake up the annoying Snorlax who is blocking the road and a Bicycle. If you haven't already gone back to Cerulean City with your Bike Voucher, do so immediately. They don't call this area Cycling Road for nothing!

Wake the Snorlax

You won't get very far unless you wake this public nuisance and get him moving. If you haven't added one of these to your collection (there are only two of them), make sure that you nab this one. Just be patient and he'll eventually be yours.

Flight

Using the Cut ability, clear out the bush right before the Snorlax and head toward the northern gatehouse. On the other side is a house where a little girl will give you her HM 02 machine. This will allow any of your Flight Pokémon to transport you anywhere on the map—as long as you've been there before. This is a great way to travel to those out of the way places!

Route 18

Route 18 lies at the bottom of Cycling Road. With the hill done and over, you can ride normally now. Fuchsia City is only a short distance away.

Fuchsia City

At the southernmost part of the main Pokémon Continent lies the seaside town of Fuchsia. Here you'll find the famous Safari Zone, home to many rare and unique Pokémon.

1. Fuchsia Gym

Gym Leader Koga has barricaded himself behind invisible walls just to make sure that you don't escape the hands of his Junior Trainers. However, if you're playing this on a Super Game Boy®, the walls just won't seem that invisible.

2. Shop near the Safari Zone

This shop is located next to the self-contained Safari Zone. You won't find any souvenirs here!

3. Safari Time

When you have few hours to spend, take on the Safari Zone. Here you'll find more Pokémon than you thought possible. Make sure that you have an empty box waiting for you on Bill's Computer,

so that you don't have to make a journey back to the Pokémon Center.

4. Game Warden's House

The Game Warden would love to tell you all about his Strength, but he lost his false teeth while patrolling the grounds of the Safari Zone. Maybe if you help him out, he'd teach you how to move that heavy boulder.

5. Fishing Guru

This home belongs to the third Fishing Guru. If you haven't already picked up the Super Rod from his other brother on Route 12, then the Good Rod he gives you will seem fine until then.

Gym Leader Lowdown #6: Koga of the Fuchsia City Gym

The choice of Poisonous and Psychic Pokémon fulfills Koga's wish to fight by cleverness rather than strength. You've seen how many HP you can lose when poisoned or otherwise unable to fight, so he may have a point. However,

if you've raised strong offensive fighters and are carrying a few Full Heals, you're going to walk all over his crafty monsters.

When you defeat him, Koga relinquishes his Soul Badge. This raises your Pokémon's defense and allows you to Surf the waves to the south, if and when you find HM 03. His present of TM 06 (Toxic) is also a helpful addition to your quest.

Safari Zone

The Safari Zone is home to many rare and spectacular Pokémon. To catch them all will require some skill, but mostly luck. Prepare to spend a lot of time and money here if you plan to collect all 150 Pokémon.

The Way Things Work

You pay the 500P admission and in return you get 30 Safari Balls. These are specially made to catch the monsters in the Safari Zone. Don't expect it to be easy though. There are a lot of Pokémon that you can catch with one or two balls. The more rare and unique characters will need more coaxing. Rocks and Food may help, but the best way to catch them is by patiently tossing Safari Ball after Safari Ball at them.

Did I Mention the Time Limit?

You have roughly 500 seconds each time you're in the Safari Zone. In concrete terms you actually have 500 steps, since the timer starts whenever you stay still, fish, or get into a battle with a Pokémon. To check on your progress, merely bring up the Menu screen.

The Contest

If you can make it to the house in the northwest corner of Area 3 before your time runs out, you'll win a special prize: HM 03 (Surf). Not only will this help you Surf across the oceans to the islands in the south, but it'll help you get around the Safari Zone much quicker! In this same area, you'll also find the Game Warden's Gold Teeth.

Routes 19 and 20

Once you leave Fuchsia City, you'll be traveling by sea to the Seafoam Islands and the Gym on Cinnabar Island. This route is filled with wild Tentacool of varying experience levels from LV 5 to LV 30. If you need to pick one up for your collection, you'll get to pick whichever one you like.

Trainer's Talk

A group of Swimmers and Beauties rule this watery road. By this time, nothing they throw at you should come as a surprise. What will be surprising is the lack of money you'll make fighting these guys! Swimmers carry very little cash on them and unless you need the experience, they're not really worth fighting.

Twin Mountains

To enter the dungeon on the Seafoam Islands, you'll need to visit the left entrance first. Then make your way through the cavern and come out on the other side. You have to exit through the door on the right mountain to continue on Route 20 to Cinnabar Island.

Seafoam Islands

In the middle of Route 20 lie the Seafoam Islands. This place is home to tons of Water Pokémon, many of whom you've probably only seen in Trainer Battles. The Seafoam Islands are also home to one of the legendary Pokémon, Articuno. This icy blue bird lies at the bottom of the cavern where the current is the strongest.

Use Your Strength

The last two floors of this dungeon are divided by a stream with an extremely fast current. So fast, that you won't be able to do much Surfing. To calm the current, you'll need to push the boulders you see lying around down the holes to the bottom floor. There are three boulders in the cave that will do the job. Can you figure this puzzle out?

Articuno

This bird is not easy to catch, but then the rarest species never are. First, before you storm into battle, save your game! This LV 50 bird is too precious to kill accidentally. Next, make sure you have about 50 or more Ultra Balls in your possession. Even paralyzed with a few HP left, Articuno is too vigorous to stay in an Ultra Ball and catching him will largely be a matter of luck and patience. Then, carefully whittle away at his HP. You don't want to use a Pokémon that is overly strong, but you'll want one who will last the battle. Start throwing Ultra Balls when you have Articuno down to a mere sliver of his HP gauge and ... good luck.

Cinnabar Island

Floating in the middle of the sea to the west of Seafoam Islands, lies tiny Cinnabar Island. There may not be much land here, but you'll still find yourself surrounded with action. Cinnabar has long been known as a place for Pokémon research. Head over to the Pokémon Lab and see what new research is being done. Or, if you have time, look at the abandoned research facilities in the Pokémon House. You might even learn about new species of Pokémon.

Inside the Lab, you'll find lots of people buzzing about Pokémon research. The room at the far end is even used to research fossils. Go get the fossils you got from Pewter City and Mt. Moon and let the Scientist look at them. I think he might actually be able to revive them.

Also, be on the lookout for traders. Some of them might even have something you're looking for.

3. Pokémon House

This once-ornate center of Pokémon learning has fallen into disuse and now Burglars roam about trying to find things to steal. They say that a certain key is found there

4. Cinnabar Island Gym

The door is locked. Find the key and battle your way through the hallways of Trainers to find the reclusive Blaine.

Gym Leader Lowdown #7: Blaine at the Cinnabar Island Gym

Blaine tries as hard as he can to keep the public away. Not only has he locked the door with a well-hidden key, but then you have to fight Trainer after Trainer before you reach the final barrier!

While you're doing that you'll have ample time to determine a strategy against Flame Pokémon. I'd suggest using a Water Pokémon or even a Ground/Rock type if you have one handy.

When he's been toasted, Blaine will give you his Volcano Badge. This increases your Pokémon's special skills! He'll also give you TM 38, which teaches a lucky Flame Pokémon the skill Fire Blast. That might come in handy against the Elite Four on Indigo Plateau.

Trainer's Talk

The Scientists and Burglars in this house will serve as a good warm up for Blaine and the Trainers at the Cinnabar Island Gym. If you can beat these Trainers easily, you'll do fine against Blaine.

Hidden Switches

There are switches hidden in the statues. If you pull one, certain doors will open and others will close. One pull of the switch effects the whole house. Remember this if you think you're stuck.

No Stairs to the Basement

Well, of course, the key is in the basement. But how are you going to get there? The only way down seems to be by jumping...from the third floor, of course! Try the open area to the left of the Scientist. That seems to be the fastest way down.

More Trainer's Talk?

If you're tired of fighting, hug the wall to the left and you'll stay out of the path of all of the Trainers on this route. They're the usual lot of Swimmers with a few Fishermen standing on piers in the middle of the water. Fight them if you think that your Pokémon need the practice and the added experience, but if you're dying to get to the end, it's OK if you skip them.

The plot of grass south of Pallet Town is home to the usual Pokémon, except for one. In these thickets, and these thickets alone, you'll find the rare Tangela. So, stopping here to hunt is a good idea.

Route 22

Hopefully this street isn't new to you or you missed out on a good opportunity to catch some Nidoran early on in the game. At the end of the road lies the entrance to Route 23 and Victory Road. Before you can walk through the doors, you'll have to have all eight Badges in your possession. Guards posted along Route 23 will check, so don't try to fool them.

ROUTE 22

Yes, once again you'll find your Rival lying in wait on this road. Apparently he's already fought the Elite Four and wants to give you a taste of what's to come. The pressure plates hold the stone doors open, but you can't be in two places at once. Try pushing the boulders over to the pressure plates to hold them open.

Two Routes

There are two routes that you can take in Victory Road. Using stairs A, B, and C will take you to the exit while detouring to stairs D and E will take you to Moltos' lair.

Moltos

This legendary Flame Bird is just as hard to catch as Articuno in the Seafoam Islands. Use the same techniques to weaken and capture it as you did with Articuno and you should be fine. Remember to save before you approach him though!

Indigo Plateau

Finally—the end. I hope you weren't expecting a full-fledged city or something? Indigo Plateau combines the best of a Poké Mart with all the conveniences of a Pokémon Center. You can heal your Pokémon and buy the most powerful Potions here before your big encounter with the Elite Four.

Final Battle Against Your Rival

The Pokémon your Rival chose at the beginning of the game determines the lineup he'll have here at the end. Your Rival has compiled a very well-rounded band of Pokémon to fight against you. He has representatives of all of the major groups

(Psychic, Flight, Ground, Water, Fire, and Grass), and you'll want to have a troop of Pokémon that can counter them. This is probably the toughest fight you'll have in the game, so remember all that you've learned and good luck!

Aftermath

So the game ends. But does it really? You still have lots of Pokémon to collect and you haven't even explored the Unknown Dungeon. Take heart. Once you finish this battle, your game is saved and restarts back at the Pallet Town Pokémon Center. From there you can roam the world freely collecting as many Pokémon as you want. You can even take on the Elite Four as many times as you like (it's a great way to level up your Pokémon).

Power Plant

You can access the Power Plant once you've learned the Surf ability. Inside you'll find a ton of Electric Pokémon and the third of the Bird Trio, the legendary Zapdos.

Item Ball or Voltorb?

It's hard to tell the difference, isn't it? You can only really tell when you pick one up. If it comes alive, then you guessed wrong.

Zapdos

Right before the exit of the Power Plant you'll find the Electric Bird Zapdos. If you're a fan of Electric Pokémon then you definitely want to add this bird to your arsenal.

Save before approaching and capture him using the same techniques as you used with his brethren.

Warning: High-Level Monsters Inside!

Unknown Dungeon is known for the powerful and dangerous monsters inside. They range in experience from LV 50 on up. The Mewtwo that you can capture in the basement is a tough LV 70.

ALL the SKILLS You Ever Need to Know

Raising Pokémon can be confusing work—especially when you find yourself having to pick and choose between a bunch of skills. Each Pokémon retains the knowledge of up to four skills at once. To learn more than that, your Pokémon is going to have to forget something! Use this list of skills to help you determine which skills to keep and which to get rid of.

Function

Basic tool for catching wild Pokémon.

More effective at capturing Pokémon than the Poké Ball.

Has the highest capture ratio of all the Monster Balls that you can purchase in a Poké Mart.

Monster Balls used exclusively in the Safari Zone.

The ultimate Monster Ball! This captures 100 percent of the time, but you only get one of them.

An expensive bike that you can use to travel around faster or in areas like Cycling Road.

A magical rope which pulls you out of a cave or gym and takes you to the last Pokémon Center visited.

A popular Pokémon doll that distracts enemy Pokémon and makes them want to flee!

A spray repellent that keeps wild Pokémon at bay for a short amount of time (about 100 steps). Your lead Pokémon's level determines whether your other Pokémon will be attacked. Any Pokémon with a level which is lower than the lead Pokémon's will be attacked.

A more powerful spray that protects you from random attacks for about 200 steps.

The most powerful repellent on the market. Protects you for 250 steps.
